

Prairie Food Systems Vision Solutions Lab

We invite your collaboration in answering these research questions as we work toward unified vision and action to achieve a just, equitable, sustainable, and prosperous food system.

Our **virtual solutions lab** brings collaborators together to propose, collect, refine, enact, and assess practices and projects that have potential to decolonize and transform the prairie food system. Collaborators are invited to share ideas [here](#).

In each of these areas:

- Are there practices you know of that are already contributing to solutions?
- How does your work support solutions?
 - How can we decolonize the system?
- How can we achieve a unified vision and effective action?
 - What needs to be done to realize the vision?
